WTTC	World Travel and Tourism Council

Foreword by the Minister

South Africa's quarterly economic performance in 2020 showed a strong correlation with the quarterly performance of the tourism sector. This relationship underscores the tourism sector's impact on the wider economy. The devastation of the tourism sector by the COVID-19 pandemic has been reflected on the poor performance of the wider South African economy for the year 2020.

Globally, during the height of the pandemic, last year, World Travel and Tourism Council (WTTC) estimated that 174 million Travel and Tourism jobs were at risk. However, as countries are getting better at managing the pandemic, the WTTC's latest analysis, shows an optimistic scenario that predicts the revival of as many as 111 million jobs which would still be 17% below 2019 figures, accounting for 54 million fewer jobs. This shows that there is optimism around the world that the tourism sector will recover very fast.

Locally, 92% of tourism businesses surveyed, in October 2020, through collaboration between IFC, Department of Tourism and TBCSA reported a more than 50% decline in revenues compared to October 2019, and 36% of businesses indicated a total loss of revenue. With regard to forward bookings, 78% of business reported forward bookings held in October 2020 are at least 50% less than bookings held in October 2019, and 23% had no booking. On occupancy/customer use, 88% of businesses surveyed indicated that occupancy in October 2020 was down more than 50% compared to October 2019, and 38% indicated no occupancy.

This level of devastation necessitated a process of the collaboration of the Travel and Tourism public and private sector in developing a path to recovery. Accordingly, the broader South African tourism sector worked together to develop the Tourism Sector Recovery Plan (TSRP). It is aligned to the country's Economic Reconstruction and recovery (ERRP), in particular the ERRP's priorities of mass employment creation; infrastructure investment; green economy interventions; gender equality and the inclusion of women and youth; as well as skills development.

The TSRP seeks not only to return the tourism sector's performance to levels it reached before the outbreak of COVID-19, but also to place it on a long-term sustainable growth trajectory leveraging on South Africa's vast and diverse tourism potential. It is anchored on three interlinked pillars or strategic themes: protect and rejuvenate supply, re-igniting demand and strengthening enabling capability for long-term sustainability. It outlines specific interventions under each strategic theme, with timeframes and lines

of accountability. These interventions will be implemented simultaneously taking into account the effects of the stop and start cycles that the sector will be expected to deal with at least in the short to medium term as the virus evolves bringing with it possible new waves and strains.

Simultaneous implementation of the interventions in the TSRP means that efforts to rejuvenate and protect the supply side will be undertaken jointly with efforts to ignite demand; locally, regionally and across the globe. Furthermore, interventions undertaken in the current period will also be deliberately targeted towards ensuring the long-term sustainability of the sector.

This Annual Performance Plan (APP) outlines amongst other things, how the interventions outlined in the TRSP are going to be implemented in the financial year 2021/2022. The Department will implement the publication of the Norms and Standards for the safe operations in the sector across the value chain to enable safe travel and rebuild traveller confidence. In addition, the department will encourage the adoption and monitor of the implementation of the Norms and Standards by businesses across the value chain.

The re-ignition of demand has to be met with sufficient supply. In this regard a correct product-pricing mix are a key to addressing both international and domestic demand. This includes the costs and availability of the transport enabler that allows tourists to get to and move within destinations. While South Africa has no shortage of tourism products, both public and private sector owners will have to consider how these products are packaged and priced for the domestic and regional consumer. In this connection the department established a pilot on the budget resort concept and brand is an initiative to meet the anticipated changes in domestic and regional demand. This initiative is the incorporation of prioritised initiatives from tourism masterplans into DDM Plans for various districts. The key risks related to this initiative pertain to the lack of stakeholder buy-in, resourcing and institutional arrangements.

The Department will intensify its efforts on resource and investment mobilisation efforts to support supply requirements of the COVID-19 era will continue. This support will be provided through investment promotion efforts for both existing (Brownfield) and new (Greenfield) projects. Project packaging is a key enabler for successful investment promotion efforts. The key risk at present is that there is high global demand for investors and this may hamper resource and investment mobilisation efforts.

These efforts will be bolstered by the implementation of the Tourism Equity Fund. The Tourism Equity Fund (TEF) is an equity acquisition fund that will be managed by SEFA on behalf of the Department of Tourism. The Department of Tourism intends to pilot the TEF in partnership with SEFA for an initial pilot phase period of 3 years with a view to promote the participation of Black enterprises within the tourism industry. TEF will be capitalised by the Department of Tourism to the value of R540 million over 3 years. This funding will be utilised as a capital injection by means of a grant contribution towards funding acquisitions and development and expansion projects by black tourism industrialists up to a maximum of R20 million per enterprise. This capital injection will be used to leverage at least 50% additional funding per transaction. The Fund will focus on the majority black owned (51%) and black management-controlled tourism enterprises.

A critical part of the recovery effort is to ensure that, while travel volumes have almost ground to a halt, the supply side of the sector is protected and rejuvenated. Tourism infrastructure development and maintenance works of products and attractions will create job and SMME opportunities, in compliance with the PFMA. There is substantial scope for labour intensive work through construction work and maintenance contracts to promote SMME development, Broad-Based Black Economic Empowerment (B-BBEE), involvement of women and youth, and local employment coupled with appropriate enterprise development. The programme measures the quality of product offerings, to enhance the visitor experience that will be implemented in the medium-term in order to improve destination competitiveness.

A key intervention to protect tourism supply is the implementation of a Tourism Infrastructure Maintenance Programme of state-owned assets. The planned initiative involves destination enhancement of South African tourism assets and infrastructure making South Africa a diverse and unique tourism destination. The focus is on diversifying and enhancing tourism product offerings, with specific reference to improving and upgrading experiences at key tourism sites such as at World Heritage Sites, National Heritage Sites, National Parks, Botanical Gardens, Indi-Atlantic Route, Rural/Township precincts.

Work is underway on the review of the tourism policy that will culminate in the development of a new policy framework that deliver efficient, effective and purpose-led support for sector growth and development. The review of the White Paper and other pieces of legislation will ensure that recent developments are taken into consideration.

I take this opportunity to appreciate the support I continue to receive from Deputy Minister Mahlalela. To the Director-General Mr Victor Tharage together with the Management and entire staff thank you for your continued hard work and dedication in ensuring that we serve the Republic with its people to our best ability; to all our stakeholders. thank you for your partnership.

Ms Mmamoloko Kubayi-Ngubane, MP

Minister of Tourism

Message by the Deputy Minister

The year 2021/2022 is to usher hope after we had been confronted with an unprecedented public health crisis that had and still has far-reaching social and economic consequences for the countries of the world. The hope is brought about by the glimpse of light that shone in the middle of quarter four of the 2020/21 FY, when our country was placed in COVID-19 alert level 1.

The pandemic has brought into sharper focus the fault lines of inequality, income deprivation, asset poverty, and lack of skills and economic opportunities amongst the majority of our people who happen to be the blacks in general and Africans in particular, of which women and the youth are the most affected. Though the pandemic continues unabated, it is important for us to remain committed to recovery of the industry and to preserve the tourism value chain through our targeted response, relief and recovery efforts, in line with government's Reconstruction and Recovery Plan.

As we begin the arduous task of recovery, we must ensure that this is also characterised by reconstruction that addresses the fundamental inequalities and exclusions that continue to characterize the tourism industry. Our concern about the impact the virus will have on our societies, our economies and our public health system, cannot deter us from smart planning to achieve the mandate given to our government by the communities.

As the sector begins to recover in the wake of COVID-19, government will undertake major actions to position the South African brand, and reignite the international demand in the face of challenges emanating from the scientific discovery of the 501Y.V2 COVID19 variant. Work will be done to drive the message that South Africa is a brand that provides a safe tourist experience, and is ready to deliver on expected quality for international and domestic tourists, through implementation of the norms and standards for safe tourism operations.

The COVID-19 pandemic has taught us to devise new ways of doing things since the prior methods could no more yield the results we are envisaging. Domestic tourism, as a driver for economic recovery will be elevated. More emphasis will be on developing our South African product that will attract both tourists and investors from within and abroad. The promotion of domestic tourism is the first step in reigniting the tourism economy. In particular, domestic tourism can act as an indicator of the health and security in travel destinations in preparation for the arrival of international visitors.

While strides to create a conducive environment for tourism business are recognised, challenges and threats could not be wished away. The challenge however is that the stop/start cycles the industry may be dealing with for some time, now and in the near future, are negatively influencing on domestic travel.

The hope of the world and the country lies in the government massive roll out vaccination programme meant to save lives of our people and to dramatically reduce infections across the population. The early and rapid deployment of the vaccine, including to frontline tourism workers, as proposed in the COVID-19 vaccine rollout plan, will be a game-changer in ensuring that travelers feel safe to travel again.

South Africa has grown to be a notable global competitor as a meetings and mega-events destination. The events industry hosts about one million delegates annually and 11.4% of foreign tourism expenditure was attributed to this industry in 2019.

The country remains an ideal destination for such a range of events because of pleasant climatic conditions, cities and towns are unique and full of character, and the infrastructure is equipped to handle the influx of visitors that love supporting the festivities. We shall pursue opportunities to harness the potential for growth afforded by the hosting of events as part of the tourism recovery and the overall development and transformation of the sector. The reopening of the tourism economy using the hosting of significant events, therefore presents a unique opportunity to rethink or reposition the destination, and rejuvenate our position as an events destination.

As government mobilises all of the resources at its disposal to support economic recovery, we cannot lose sight of the need to support the resilience of our supply side and proceeding with our efforts to strengthen the local government infrastructure and accelerate service delivery through the District Development Model (DDM). Responsible tourism is that which includes community-based tourism.

The sector will continue with the tourism skills development programme. This will be done by identifying learners from all the nine provinces. The plan is to enable geographic spread of employment and economic opportunities. Accordingly, it can be expected that the major beneficiaries of the reduced impact of the COVID-19 crisis on employment, because of the implementation of the Tourism Sector Recovery Plan, will be women, including rural women, young people and those living with disabilities.

In particular, we are focusing on upskilling small tourism enterprises that create jobs, offer authentic experiences and empower communities. Furthermore, people with disabilities shall also benefit in this regard with targeted initiatives such as the establishment of the Tourism Equity Fund (TEF). Transformation is not only a fundamental obligation enshrined in the country's Constitution. It is also imperative of our tourism industry to benefit from the creativity, talent, energy and skills of all South Africans.

We have successfully implemented some of our trailblazing skills programme like the Food Safety Quality Assurer Programme, Professional Cookery, Wine Service (Sommelier) Hospitality; Food and Beverage, inclusive of standard module on norms and standards for safe tourism operations.

While there remains some uncertainty around the timeframes and the extent, to which traditional tourism trade platforms will reopen in the near future, the Department is looking at ways and means to re-introduce the revised Market Access Support Programme during the 2021/22 financial year.

To rebuild and strengthen trade relations with international buyers will be a critical element in the coming months, and supporting small tourism enterprises to participate in international trade platforms, will remain an important lever to support the recovery of the sector and stimulate inclusive growth.

The tourism sector will never be the same again, but we remain responsible for what will re-emerge of it. It is only through working together that we will achieve our goals and re-ignite our economy, not to what it was before COVID-19 visited our shore, but beyond, so that it can respond to all the challenges brought about by the pandemic. Our targets for 2021/22 are our contract with which we, as a Department, are inviting all the stakeholders to work together with us in ensuring that we collectively create a transformed, inclusive tourism economy. We have to decisively change the face of our tourism industry, and not by simply returning it to where it was before the pandemic. This means that, our task is not only to **build back better**, but to **build forward differently**.

Our Minister has done well in leading efforts towards doing all that is necessary for the tourism sector re-opening and recovery. Through her exemplary leadership, we all have taken note of the importance of keeping safe, and doing tourism in a safe way that assures all that we are ready for business.

A word of appreciation must also be conveyed to the Director-General, his management team, as well as to all Team Tourism, for all work done in planning the work of tourism for recovery after the devastating effects of COVID-19 pandemic.

Mr Fish Mahlalela, MP

Deputy Minister of Tourism

Statement by the Accounting Officer

Prior to the outbreak of the COVID-19 pandemic, the South African tourism sector's contribution to economic output and employment had been flat on pre-2008 financial crisis levels. In addition, the global tourism growth had outstripped local growth performance over the past decade. The COVID-19 pandemic has compounded these challenges. The Department's seeks to contribute towards placing the country's tourism sector on a growth trajectory that fully realises the country's vast and diverse tourism potential.

Forecasting the impact of the pandemic on the tourism economy is riddled with uncertainties and has often been overtaken by changes and adjustments to containment measures. Accordingly, the full consequences of the pandemic on the tourism sector is not yet clear. This makes policy responses subject to fluidity and constant changes, and calls for models for adaptations.

While forecasting the full extent of the impact the pandemic on tourism remains a challenge, what is clear is that a return to business as usual is not possible, at least for the near future. The tourism sector will have to operate in the context of a new normal. Part of the new normal is that the tourism economy will have to exist alongside the virus, at least in the short to medium term. This is reinforced by the continued possibility of the emergence of different variants of the virus coupled with the occurrence of more new waves almost imposing seasonality of their own.

Developments around the worldwide deployment of the COVID-19 vaccines are likely to lift the tourism consumer and business confidence. However, the deployment of the vaccines is likely to be uneven. It will also take time to achieve herd or population immunity in many parts of the world. The International Monetary Fund (IMF) expects that with growing vaccine availability, testing, and tracing, local transmission of the virus is expected to be brought to low levels everywhere only by the end of 2022.

In addition to the tourism sector having to exist alongside the virus, the sector faces potential threats of numerous stop/start cycles as restrictions are changed and adjusted in line with the evolution of the virus. These stop/start cycles will affect traveler confidence and place jobs and the survival of tourism firms at risk. They will further make the recovery highly uncertain. Flexibility as well as the adaptability of firms to the new normal across the value chain will be critical in responding to the stop/start cycles.

The country brand is under pressure due the association of the emergence of new variant of the COVID-19 with South Africa. In response, some countries have issued travel advisories and even travel bans to and from South Africa. This will hamper efforts to drive tourism sector recovery. More clarity about the virus and its variants, through public awareness from the scientific community, will be required. Preparations for future of global travel may include significant changes in the requirements for cross boarder movements. Important decisions are still to be made in this regard, including but not limited to the role of vaccines in travel, role of tests for COVID-19 where individuals have been vaccinated, and whether there will be future global mapping of areas where population immunity has been reached.

In order to intervene in the challenges in the medium-term, the Department has developed the Tourism Sector Recovery Plan (TSRP). This plan includes several interventions to protect and rejuvenate supply, re-ignite demand and strengthen enabling capability for long-term sustainability. The Department's 2021/2022 APP contains projects geared towards giving practical expression to the TSRP.

A critical part of the recovery effort is to ensure that, while travel volumes had almost come to a halt, the supply side of the sector is protected and rejuvenated. For the Department, this involves protecting core tourism infrastructure and assets to prevent them from deteriorating and thus weakening the supply side of the sector. A weakened supply side will make recovery more difficult and protracted.

To protect tourism supply, Tourism Infrastructure Maintenance Programme of state-owned assets will be implemented. The emphasis will be on critical actions needed to preserve tourism supply. These will include the enhancement of tourism assets and core infrastructure of in the State's domain to prepare the sector for recovery. This presents a unique opportunity to upscale the refurbishment and maintenance of existing tourism infrastructure of state-owned assets such as precincts, protected areas, national and provincial parks, botanical and zoological gardens, heritage sites, amongst other state-owned attractions. Enhancement work of our destination is critical to improve the quality of product offering, through upgrades, refurbishment and maintenance, of state-owned assets.

Tourism infrastructure development and maintenance works of products and attractions will create jobs and SMME opportunities. There is substantial scope for labour intensive work through construction work and maintenance contracts to promote SMME development, B-BBEE, involvement of women and youth, and local employment coupled with appropriate enterprise development.

At the beginning of the pandemic, several support mechanisms were put in place both at national and provincial level. These were in order to support tourism firms in distress. Our Department introduced a R200 million Tourism Relief Fund to support 4 000 businesses, and a R30 million Tourist Guides Relief Fund to support freelance or self-employed tourist guides. While some of these measures are still running in some provinces albeit at a low scale, they are not nearly enough. For that reason, where required, support will be provided to tourism firms in distress in their effort to access part of the R200 billion government backed loan guarantee scheme. This will inform the non-financial support programme for tourism firms to be implemented in terms of the TSRP. A non-financial support programme that provides businesses with access to compliance training resources, visitor experience optimization tools, proposition and marketing support and recovery planning advisory will also be implemented.

The TSRP recommends the implementation of the Tourism Equity Fund (TEF) as part of strengthening the sector's supply side. This should be done in a manner that addresses the reconstruction of the sector, as well as advancement of transformation through enabling expanded participation of black people, women, youth and people with disabilities in the sector. This initiative brings together government, Development Finance Institutions (DFIs) and Commercial Banks to pull resources together for ease of access to capital and operational funding. Its success will see a relative degree of inclusivity in the sector, which will emerge after full recovery. The TEF will be implemented, as part of ensuring that the sector that emerges after recovery is moving towards inclusivity in its form. The TEF will assist to fast-track transformation within the sector, through expanded support for SMMEs; deepening the spatial tourism sub-sector product offerings in villages, townships and small towns; as well as facilitating the participation of women, youth and people with disabilities.

The TSRP is aligned to the country's Economic Reconstruction and Recovery Plan (ERRP), in particular, the ERRP's priorities of mass employment creation; infrastructure investment; green economy interventions; gender equality and the inclusion of women and youth; as well as skills development. The ERRP recognises that tourism, cultural and creative industries were among the hardest hit by COVID-19. Therefore, efforts are aimed at ensuring that these sectors' recovery and growth are central to the overall reconstruction and recovery effort. This is because the tourism sector is a growth multiplier for many other industries. The TSRP identifies enablers and risks to tourism revival. Key among these is the pace at which the COVID-19 vaccines are deployed. This is a major element in driving business and consumer confidence in the sector. The TSRP identifies vaccine

deployment; South Africa's brand positioning and the easing and removal of travel restrictions, especially from inbound source markets as key enablers.

Note is taken however, that a return to pre-pandemic levels is unlikely before 2023 or later. Travel restrictions remain as a barrier weighing on the recovery of international tourism. Domestic travel, however, offers a glimmer of hope, provided safety concerns are adequately addressed, coupled with aggressive marketing and promotional campaigns.

I would like to express my appreciation to the leadership shown by the Minister and the Deputy Minister of Tourism in the development of the Department's APP for 2021/2022. Their role and exemplary leadership in criss-crossing our country to spread the message of hope for our sector recovery has not gone unnoticed.

Our interaction with our Parliamentary Portfolio and Select Committees is not only a source of encouragement for us to continue to improve our work. It is important in assisting us never to forget the realities we are face with and to be responsive in our planning.

It is through our engagement with our stakeholders in the tourism sector that we can address the challenges, and broaden the base for increased participation by those for whom plans are designed. This, we hope, will go a long way towards assisting all efforts aimed at addressing the challenges of poverty, inequality and unemployment.

The amount of time, effort and commitment shown by Team Tourism, in always exploring ways to do more with less, and craft plans that reflect just that, indicates how alive we are to the socio-economic realities within which tourism must be done. I express my gratitude to all the colleagues in the Department in their respective roles who continue to be commitment to the service of our country South Africa. We will continue to ensure that there is greater stewardship and accountability in the use of the public resources as we execute this plan effectively, economically and with efficiency.

Mr Nkhumeleni Victor Tharage

Director-General

Official Sign-Off

It is hereby certified that this Annual Performance Plan:

- was developed by the management of the Department of Tourism under the guidance of the Minister;
- takes into account all the relevant policies, legislation and other mandates for which the Department of Tourism is responsible;
- accurately reflects the Outcomes and Outputs which the Department of Tourism will endeavour to achieve in 2021/2022 – 2023/2024.

PART A: OUR MANDATE

1. Updates to the relevant legislative and policy mandates

1.1 Legislative mandate

Tourism Act, 2014 (Act No.3 of 2014) aims to promote the practise of responsible tourism for the benefit of the Republic and for the enjoyment of all its residents and foreign visitors; provide for the effective domestic and international marketing of South Africa as a tourist destination; promote quality tourism products and services; promote growth in and development of the tourism sector, and enhance cooperation and coordination between all spheres of government in developing and managing tourism.

1.2 Policy mandate

- The White Paper on the Development and Promotion of Tourism in South Africa, 1996, provides a framework and guidelines for tourism development and promotion in South.
- The National Development Plan (NDP) is the 2030 vision for the country. It envisions rising employment, productivity and incomes as a way to ensure a long-term solution to achieve a reduction in inequality, an improvement in living standards and ensuring a dignified existence for all South Africans. The NDP recognises tourism as one of the main drivers of employment and economic growth.
- The Re-imagined Industrial Strategy identifies tourism as one of the seven national priority sectors.
- The National Tourism Sector Strategy (NTSS) guides the strategic development and growth on the tourism sector in pursuit of NDP targets.
- Tourism Sector Recovery Plan (TSRP) sets out interventions to ignite the recovery of the tourism sector, and to place it on path to long-term sustainability whilst contributing to the implementation of the Economic Reconstruction and Recovery Plan (ERRP).

2. Updates to Institutional Policies and Strategies

The following policies and strategies are due for review within this medium term:

- National Tourism Sector Strategy, 2016.
- White Paper on the Development and Promotion of Tourism in South Africa, 1996.
- Tourism Act, 2014.
- National Grading System.

3. Updates to Relevant Court Rulings

Not applicable.

PART B: OUR STRATEGIC FOCUS

4. Updated Situation Analysis

4.1 External Environment Analysis

4.1.1 Impact of COVID-19 Pandemic on the Global Economy

The tourism-operating environment has fundamentally changed because of severe disruptions by the pandemic. International demand was also disrupted, and is likely to be impacted by new and evolving traveller behaviour trends. Domestic demand is under strain due to the impact of the pandemic on disposable incomes. Uncertainty remains a core feature of the changing environment.

The COVID-19 pandemic has plunged the world economy into its most serious challenge in the post-war era. Global output, employment, trade and investment have been impacted negatively. The International Monetary Fund (IMF) expects global recovery from the 2020 and strengthen gradually in 2021. The recovery is likely to be characterised by continued social distancing until health risks are addressed, and the need to tighten mitigation measures, depending on the spread of the virus, access to medical interventions aimed at containing the COVID-19 pandemic¹. This indicates the significance of the vaccine deployment in the global recovery. China is expected to lead the global recovery, followed by Emerging and Developing Economies and the Advanced.

The COVID-19 pandemic has plunged the tourism sector into an unprecedented crisis, globally. Tourism was one of the first economic activities to be deeply impacted by the pandemic, as well as measures to contain its spread. The sector is facing profound and simultaneous demand and supply shocks. Historically, the tourism sector has been resilient, and quick to lift itself out of tough economic times, including global financial meltdowns and health pandemic. However, the sheer scale and depth of the disruptions to the sector caused by the COVID-19 pandemic crisis suggest that the road to recovery will be long and highly uncertain. The World Tourism Organisation (UNWTO) Panel of Experts Survey expects the sector to return to pre-crisis levels only in 2023. Until then, the sector will be in survival mode. There is a potential for more job losses and permanent closures of more firms within the sector².

4.1.2 Key trends in Global Travel

The COVID-19 pandemic, its related health and safety concerns, as well as restrictions to curb the spread of the pandemic, is forcing a profound change in traveler preferences and choices of destinations to visit. A post lockdown yearning for open spaces along with the desire to avoid crowded spaces has shifted remote, empty destinations to the top of many travelers' wish lists.

There is also a noticeable uptick in interest from older people – who are likely to be among the first to be vaccinated – to visit their favorite cities without the “madding crowd.” Global tour operators are also reporting a growing number of inquiries for full on once in a lifetime adventures. This is partly because of pent-up demand and partly because of a sense of “needing to take life by the horns before it is too late.” Island destinations are also becoming popular as travelers feel the need to return to the seclusion of an island. Island destinations give the traveler a sense of being in a controlled COVID-19 safe environment.

There appears to be a return by travelers to the idea of “slow travel”, i.e. taking fewer but longer holidays. Travelers also prefer “staycations”, that is traveling to tourism attraction without overnight stay, or traveling to tourism destination that are nearby. Road travel as opposed to air travel appears to be the preferred mode of holiday travelers. According to International Air Transport Association (IATA) recovery in air passenger volumes stalled towards the end of 2020³.

The explosion in remote work is supporting another emerging trend where remote workers can work literally from anywhere including from a beach side villa, a safari camp, village lodge or a hotel room. Remote workers, therefore, are potential holiday travelers and can stay longer at destinations. Some destinations are already incentivising remote workers to stay in tourism destinations longer including having better connectivity and access to office equipment or business center.

3 IATA. 2020. Air Passenger Market Analysis: Passenger volumes did not improve in December p.3
Web: <https://www.iata.org/en/iata-repository/publications/economic-reports/air-passenger-monthly-analysis---december-2020/>

Another emerging trend is that travelers are increasingly concerned about their own safety, environmental safety and the effects of tourism on the destinations being visited. This has thrust issues of safety, tourism sustainability onto the top of the list of considerations for travelers.

While demand for international travel remains subdued, domestic tourism continues to grow in several large markets such as China and Russia, where domestic air travel demand has mostly returned to pre-COVID levels. According to the IATA (2020), domestic travel in China was mostly back to normal in October 2020, Japan and Brazil posted robust improvements, and Russia remained more resilient than most markets⁴. To support domestic travel, countries are offering financial incentives to firms as part of strengthening the supply side and preventing its collapse. Governments are also collaborating with the industry on marketing and promotion campaigns, the offering of vouchers and discounts. Online platforms are increasingly being used for marketing and promotion purposes.

One of the recent trends emerging within the tourism sector is that of a growing concern by travelers about their own safety, the environment and the effects of tourism on the destinations being visited. This suggests that environmental sustainability is one of the major considerations for travelers before making the decision to travel. The COVID-19 crisis provides an opportunity to focus on the environmental sustainability of the tourism sector, to promote structural transformation, and ensure greater use of technology; all of which are necessary ingredients towards a more sustainable, inclusive and resilient tourism sector.

4.1.3 Significance of Tourism

Tourism, with its extensive value chain and labor absorption capacity, remains an important contributor to the South African economy. It is a significant earner of foreign exchange and provides employment to people of varying skills levels. It promotes geographic spread of benefits such as employment and economic opportunities. It has the ability to expand economic activity to rural areas.

With more than 54% of the tourism workforce being women⁵, including rural women, tourism can play a critical role in promoting financial and economic inclusion of women. In addition, through its significant forward and backward linkages with other economic

⁴ IATA. 2020. Air Passenger Market Analysis: Passenger volumes did not improve in December p.3
Web: <https://www.iata.org/en/iata-repository/publications/economic-reports/air-passenger-monthly-analysis---december-2020/>

⁵ <https://www.e-unwto.org/doi/epdf/10.18111/9789284420384>

sectors, tourism has a major impact on the wider economy. As a truly aspirational destination, combining powerful social justice history, breath-taking natural beauty, and warm, welcoming and diverse people, South Africa's tourism potential is immeasurable.

4.1.4 Economic Contribution of the Tourism Sector

Tourism plays an important role in the broader South African economy. As a tertiary sector with strong linkages to transportation, consumer retail and financial services and other network industries, tourism's indirect economic contribution is substantial. 2019 data from both the World Travel and Tourism Council (WTTC)⁶, indicate that the tourism sector total tourism and travel contribution to GDP as ZAR354.9BN (USD24.6BN), which is 7.0% of the total economy. Travel and tourism contribution to employment is recorded as 1,483.2 JOBS (000's), which is 9.1% of the total employment. International visitor impact is recorded as ZAR129.9BN in visitor spend (8.6% of total exports).

Tourism supports a vibrant and complex value chain. It is a sector not characterised by significant market concentration or deep vertical integration like many other sectors in South Africa. Tourism activity occurs across five sub-sectors namely: Travel distribution and intermediaries, transport and related services, accommodation, entertainment and related services, and support and indirect services. Within each sub-sector, there are a number of industries that support a diverse range of visitor services and experiences.

4.1.5 Impact of COVID-19 Pandemic on South African Economy

South Africa faces persistent challenges of inequality, unemployment and poverty. These challenges have overtime been worsened by sustained low levels of investment and growth. The outbreak of the COVID-19 pandemic in March 2020, found a vulnerable South African economy. In fact, at the time pandemic reached South Africa, the country's economy had experienced two consecutive quarters of negative growth. As a result, the COVID-19 pandemic deepened the economic crisis. Many people lost their jobs and income as a result, for extended periods, leading to hunger. Inequality is expected to widen and poverty to deepen. The stagnation of the economy for a long period, coupled with the COVID-19 crisis has also led to low levels of capacity utilization in the various sectors of the South African economy. This trend is projected to continue; painting a dire picture for gross fixed capital formation. A significant reduction in the gross fixed capital formation variable is a troubling development; given that this variable is critical in sustaining and growing the productive base of the economy⁷.

⁶ WTTC. 2020. South Africa 2020 Annual Research: Key Highlights.

⁷ https://www.gov.za/sites/default/files/gcis_document/202010/south-african-economic-reconstruction-and-recovery-plan.pdf, p.2

A positive economic growth was recorded in the third and fourth quarters of 2020. However, that was not enough to offset the devastating impact of COVID-19, experienced in the second quarter of 2020 when lockdown restrictions were at their most stringent. Economic activity for the entire year decreased by 7,0% in 2020 compared with 2019, signifying the biggest annual fall in economic activity the country since at least 1946. The second biggest fall – contraction of the economy by 2,1%, was recorded in 1992 when the country was going through a two-year-long recession, as a result of a global economic downturn⁸.

South Africa's first official case of COVID-19 was recorded on 5 March 2020. Since then a rising infection count prompted government to implement a five-level Risk-Adjusted Strategy aimed at saving lives and preserving livelihoods. This placed many firms and households in distress and jobs were lost. These developments, collectively, contributed to an "unprecedented contraction"⁹ in output in the second quarter of 2020.

Although the economy re-bounded significantly in the third quarter of 2020, the real GDP however, was only at a level similar to that in the first quarter of 2019¹⁰. Although stronger than initially expected, the recovery of the South African economy is expected to lag behind that of other emerging and developing economies.

The projected impact of COVID-19 on South Africa's output and unemployment is as follows: GDP percentage drop to -6% from 4% in 2019, and the worst-case estimate of 50% for unemployment from 32% in 2019 (from the baseline of 35% in 2020).

4.1.6 Impact of COVID-19 on the South African Tourism Industry

The Tourism's value in supporting the policy imperative of job creation remains, however, even more fundamental. Hence the South Africa's Economic Survey 2019/2020 argues that Tourism should be pursued aggressively by the country as a key part of overall COVID-19 recovery efforts. The Survey Report states that the tourism sector needs support to survive the effects of the Corona Virus crisis. Development of tourism and boosting transport infrastructure investments can contribute to economic growth and job creation during the recovery in the medium-term. This requires, amongst others, high level of government involvement in the economy, removing of barriers to domestic and foreign entry, complex rules for licences and permits, etc¹¹.

9 SARB. 2020. Quarterly Bulletin – December 2020

10 SARB. 2020. Quarterly Bulletin – December 2020.

11 OECD. 2020. Economic Surveys South Africa. July. p.15

Web:http://www.treasury.gov.za/comm_media/press/2020/20200731%20OECD%20Economic%20Survey%20SA%202020.pdf

South Africa has not been spared from the near collapse in international tourist arrivals. Hotel occupancies have declined significantly, leading to some small and large hoteliers being forced to close down. Airlines had significantly curtailed operations and many tourism attractions are either closed or operating far below capacity.

On the other hand, the weak state of the local economy and the job losses triggered by COVID-19 is impacting negatively on household disposable income, and thus limit the ability to, and affordability to travel.

In October 2020, 92% of tourism businesses surveyed (collaboration between IFC, the Department of Tourism and TBCSA) reported a more than 50% decline in revenues compared to October 2019, and 36% of businesses indicated a total loss of revenue. With regard to forward bookings, 78% of business reported forward bookings held in October 2020 are at least 50% less than bookings held in October 2019, and 23% has no booking. On occupancy/customer use, 88% of businesses surveyed indicated that occupancy in October 2020 was down more than 50% compared to October 2019, and 38% indicated no occupancy¹².

With regard to costs, 58% of businesses were unable to service their debts; 61% were unable to cover fixed costs, 58% have reduced wages for more than 50% of staff, with 40% of businesses having reduced wages for all staff; 28% of businesses have furloughed more than 50% of staff, and 12% of businesses have furloughed all staff with 33% of businesses only having furloughed less than 10% of staff; 18% of businesses had made more than 50% of staff redundant, 7% had made all staff redundant, with 33% not making any redundancies. The survey also found that in 23% of responding businesses were not operating in October 2020, but plan to reopen with 5% of businesses indicating they are closed and will not reopen¹³.

4.1.7 Response: Tourism Sector Recovery Plan (TSRP)

Noting the tourism sector's impact on the wider economy, the TSRP was developed. It is aligned to the country's Economic Reconstruction and recovery (ERRP), in particular the ERRP's priorities of mass employment creation; infrastructure investment; green economy interventions; gender equality and the inclusion of women and youth; as well as skills development.

12 Department of Tourism. 2020. Tourism Industry Survey of South Africa: COVID-19, p.5.

13 Department of Tourism. 2020. Tourism Industry Survey of South Africa: COVID-19, pp.7-11.

The TSRP seeks not only to return the tourism sector's performance to levels it reached before the outbreak of COVID-19, but also to place it on a long-term sustainable growth trajectory that fully realises South Africa's vast and diverse tourism potential. It is anchored on three interlinked pillars or strategic themes: protect and rejuvenate supply, re-igniting demand and strengthening enabling capability for long-term sustainability. It outlines specific interventions under each strategic theme, with timeframes and lines of accountability. These interventions will be implemented simultaneously taking into account the effects of the stop and start cycles that the sector will be expected to deal with at least in the short to medium term as the virus evolves bringing with it possible new waves and strains.

Simultaneous implementation of the interventions in the TSRP means that efforts to rejuvenate and protect the supply side will be undertaken jointly with efforts to ignite demand; locally, regionally and across the globe. Furthermore, interventions undertaken in the current period will also be deliberately targeted towards ensuring the long-term sustainability of the sector.

While international travel will remain subdued for some time, work will begin, in line with recommendations in the ERRP, to build a bidding pipeline for the hosting of future conferences and mega events.

Considerable work will be done to position the South African the brand, and reignite the international demand in the face of challenges emanating from the scientific discovery of the 501Y.V2 COVID19 variant. Work will be done to drive the message that South Africa is a brand that provides a safe tourist experience, and is ready to deliver on expected quality for international and domestic tourists through implementation of the norms and standards for safe tourism operations, and higher quality certification of products through the grading system.

Guided by South Africa's three-phased approach to the rollout of the vaccination programme, the TSRP's key assumption is that the country will reach herd or population immunity – vaccination of 67% of the population – by the end of 2021. However, there is a lingering risk that the country may not be able to achieve its target of herd immunity by end of 2021. Linked to this is the assumption that as South Africa reaches herd or population immunity, this will relieve the pressure on the tourism brand and boost efforts to position South Africa as a safe tourism destination.

Another assumption is that domestic travel will pick up in the short to medium term; serving as a leading indicator of South Africa's readiness to safely receive inbound visitors. This may not be the case considering the weak state of the economy and depleting household disposable income. The stop and start cycles the sector will experience, also pose a risk to the recovery of the sector. The reduced capacity of airlines and routes especially from major source markets could also pose a risk for the tourism recovery effort.

4.2 Internal Environment

The Department acknowledges, in its Tourism Sector Recovery Plan, that the tourism operating environment will, for some time, have to exist alongside the virus. This environment is potentially facing numerous stop/start cycles as restrictions are adjusted in line with the evolution of the virus. Flexibility as well as the adaptability are critical in responding to the stop/start cycles and uncertainties. For the Department and its organisational environment, this requires of the Department to recalibrates its operations to ensure that the entire organisation continues to function in a manner that ensures both compliance and service delivery even under a different service delivery environment.

Administratively, the functions that will often be affected will include: Human Resource Management (for example conducting Disciplinary Hearings and job Interviews); Communications with stakeholders (limiting public enquiries to email and call center, limiting internal communications to posters and electronic communications, staff Bulks messaging system for emergency messages as well as some updates on operations (COVID cases, water disruptions, strikes etc.); Procurement of additional

IT tools of trade, online platform licenses etc., Implementation of various business protocols to ensure seamless operations continue (for example staff rotation roster for physical reporting to the office).

The Department has continued to function and carry out its mandate in unusual circumstances that arose from the COVID-19 pandemic in our country, the national lockdown and associated restrictions. This requires resilience and agility, as well as continuing with of other unusual ways of working, such as virtual working. To continue to mitigate against the impact of COVID-19 and allow for business continuity, the Department continually revises its working arrangements in line with changes in the lockdown alert levels. Developed protocols will be implemented in line with the national lockdown regulations. Diverse platforms are used in order to strengthen communication

and ensure business continuity, within all units. These include email, zoom meetings, WhatsApp groups, phone calls, etc.). Systems and mechanisms are in place to ensure employee safety.

The Department has in place structures for control, institutionalised mechanisms and the necessary capacity to promote good governance and ethical conduct in doing its business. These include internal control mechanisms, combined with assurance procedures, promoting good ethical conduct necessary to combat and prevent fraud and corruption, implementing risk management, proper delegation of authority, proper management of information, communication, technology and other mechanisms required to entrench good governance.

The Department's management fulfils its responsibilities of maintaining an adequate internal control system to provide assurance that the organisational business and operations are conducted in an orderly and efficient manner; that policies are adhered to, that assets are safeguarded against loss and unauthorised use, and that transactions are executed according to management's authorisation.

There does exist however, inherent limitations in internal controls and procedures. Errors and lapses in control may appear that could result from staff carelessness, misunderstandings in respect of instructions, collusion between individuals, management override, etc. Even when carried out with due professional care, internal audit procedures do not guarantee that fraud will be detected.

Adequate internal control system should provide for detection of weaknesses in the system, in order that fraud, falsifications or other irregularities which may exist, can be disclose.

The Department recognises that over and above compilation and implementation of an Action Plan based on the audit report findings; adequate monitoring of the Action Plan is critical to ensure that no internal control deficiencies occur that would lead to non-compliance.

There is a need for continuous development of the organisation's capacity in order to deliver on the strategy including digital skills, analytics capabilities, spatial planning skills as well as leadership and management development. The Department will strengthen its enterprise-wide risk management system to ensure compliance with, amongst others, remunerative work done outside of public service and financial disclosure. The

department will also need to leverage on the its changed organisational environment. This will require, amongst others, observation of the requirements of the new normal in order to provide appropriate support. This means understanding of the impact of a changed environment on the employee, and the employee response to a change environment.

The Department, like all other government departments, is also mandated to deliver on women's emancipation and gender equality. This is in line with the Gender-responsive Planning, Budgeting, Monitoring, Evaluation and Gender Auditing Framework adopted by government. Giving expression to the Framework is meant to ensure that women's empowerment is at the center of public policy, planning, budgeting, and adequate resource allocation. The Department will be deliberate about projects that target women, in terms of ensuring that a certain percentage of procurement goes to women in business, and that people with disabilities and SMMEs are also prioritised.

Significant constraints to the fiscal framework and the policy position of Government to contain the public service wage will always have implications for the Department's human resource capacity. This requires of the Department to explore all possibilities for creating adequate capacity to implement its programmes and to introduce efficiency and effectiveness improvements, i.e. doing more with less. It requires of the Department to improve its procurement capacity and planning capabilities.

PART C: MEASURING OUR PERFORMANCE

5. Institutional Programme Performance Information

Programme 1: Corporate Management

Purpose: To provide strategic leadership, management and support services to the department.

Sub-Programmes and Purpose:

- **Strategy and Systems:** To manage and coordinate strategy and systems.
- **Human Resource Management and Development:** To manage the provision of human resource management and development.
- **Communications:** To manage the coordination and provision of communications support to the department.
- **Legal Services:** To manage the provision of legal support services.
- **Financial Management:** To manage and facilitate the provision of financial management services.

5.1 Outcomes, Outputs, Performance Indicators and Targets

Table 1: Outcomes, Outputs, Performance Indicators and Targets

Annual Targets						
Audited/Actual Performance			Estimated Performance	MTEF Period		
2017/18	2018/19	2019/20	2020/21	2021/22	2022/23	2023/24
Outcome: Achieve good corporate and cooperative governance.						
Output: Unqualified annual audit on financial and non-financial performance.						
Output Indicator 1: Audit outcome on financial statements and performance information.						
-	-	Unqualified audit on financial statements and performance information.	Unqualified audit on financial statements and performance information.	Unqualified audit on financial statements and performance information.	Unqualified audit on financial statements and performance information.	Unqualified audit on financial statements and performance information.
Output: To attract and retain a capable and ethical workforce in a caring environment.						
Output Indicator 2: Vacancy rate.						
Vacancy rate as at 31 March 2018 was at 6,2%.	Vacancy rate as at 31 March 2019 was at 9,1%.	Vacancy rate as at 31 March 2020 was at 9.2%.	Vacancy rate not to exceed 10% of the funded establishment.	Vacancy rate not to exceed 10% of the funded establishment.	Vacancy rate not to exceed 10% of the funded establishment.	Vacancy rate not to exceed 10% of the funded establishment.
Output: To attract and retain a capable and ethical workforce in a caring environment.						
Output Indicator 3: Percentage compliance with equity targets in terms of departmental Employment Equity Plan.						
Women representation at SMS level was maintained at 49,3% as at 31 March 2018.	Women representation at SMS level was maintained at 50,7% as at 31 March 2019.	Women representation at SMS level was at 46.5% as at 31 March 2020.	Maintain minimum of 50% women representation at SMS level through designation of SMS posts at recruitment.	Maintain minimum of 50% of Women representation at SMS level.	Maintain minimum of 50% of Women representation at SMS level.	Maintain minimum of 50% of Women representation at SMS level.
People with disabilities representation was maintained at 4,7% as at 31 March 2018.	People with disabilities representation was maintained at 4,5% as at 31 March 2019.	People with disabilities' representation was at 4.3% as at 31 March 2020.	Maintain minimum of 3% people with disabilities representation.	Maintain minimum of 3% people with disabilities representation.	Maintain minimum of 3% people with disabilities representation.	Maintain minimum of 3% people with disabilities representation.
Black representation was maintained at 95,3% as at 31 March 2018.	Black representation was maintained at 95% as at 31 March 2019.	Black representation was at 95.9% as at 31 March 2020.	Maintain minimum of 91,5% black representation.	Maintain minimum of 91.5% black representation.	Maintain minimum of 91.5% black representation.	Maintain minimum of 91.5% black representation.

Annual Targets						
Audited/Actual Performance			Estimated Performance	MTEF Period		
2017/18	2018/19	2019/20	2020/21	2021/22	2022/23	2023/24
Output: Capacity development interventions to address identified skills gaps.						
Output Indicator 4: Percentage implementation of Workplace Skills Plan (WSP) with defined targeted training interventions.

5.3 Explanation of planned performance over the medium-term period

Programme 1 - Administration includes the Ministry, Corporate Management, Financial Management and Internal Audit. For the medium-term, Corporate Management will remain agile to be able to meet the demands of tourism sector recovery. It will widen its footprint beyond the corporate business operation; support initiatives aimed the tourism sector recovery and the value chain.

Corporate Management will support and internalize the numerous Strategic Interventions outlined in the Economic Reconstruction and Recovery Pan as well as the Tourism Sector Recovery Plan to give practical expression to those. These include stimulate domestic demand through targeted initiatives and campaigns; building confidence on South

Africa as a destination through domestic events ; advancing the body of knowledge for government wide support for bidding and hosting of national events by South African National Conventions Bureau amongst others.

Programme 1 will support domestic events through a framework to facilitate government support through appropriate governance mechanisms and optimize their impact on domestic tourism. Through Human Capital Development, the Programme will ensure that the organisation has appropriate Human resources for implementation of departmental plans. Enterprise-wide risk management system will be strengthened, to augment audits and assist with early warning systems. Our Information technology systems will be enhance to ensure that the organisation deploys the ITC to streamline and bring efficiencies in our business processes.

5.4.1 Narrative: explanation of the resources allocation to achieve the outputs

Included in Programme 1: Administration, is the Ministry, Management, Corporate Management, Financial Management and Office Accommodation. Corporate Management includes the Deputy Director-General: Corporate Management, Human Resources, Communication, Legal Services, Strategy and Systems, Information and Communication Technology, and Internal Audits. This programme budget is 12.6 per cent of the total departmental budget for the 2021/22 financial year. An amount of R305.3 million has been allocated for this programme of which R151.6 million (41.7 per cent) is for Compensation of Employees.

The amount allocated for Office Accommodation for the 2021/22 financial year is R45.5 million. This is for the payment of the Head Office building of Tourism to the Department of Public Works towards the lease agreement. Goods and services budget allocation include our contractual commitments for computer services as well as our audit payments to the Office of the Auditor-General South Africa.

Programme 2: Tourism Research, Policy and International Relations

Purpose: Enhance the strategic policy environment, monitor the tourism sector's performance and enable stakeholder relations.

Sub-Programmes and Purpose:

- **Research and Knowledge Management** oversees tourism research, knowledge management and impact evaluation of the sector.
- **Policy Planning and Strategy** oversees and guides policy and strategy development for the tourism sector, and ensures the efficient and effective management of stakeholder relations.
- **South African Tourism** stimulates sustainable international and domestic demand for South African tourism experiences, and regulates the standard of tourism facilities and services.
- **International Relations and Cooperation** drives South Africa's interests through international relations and cooperation.

5.7 Explanation of planned performance over the medium-term period

In order to enhance the strategic policy environment, monitor the tourism sector's performance and enable stakeholder relations, Programme 2: Tourism Research, Policy and International Relations, provides support to the Department and the tourism sector through the provision of the following services: Research; Statistics; Knowledge Management; Monitoring and Evaluation; Policy and Strategy Development; International Relations; Strategic Sector Partnerships and Entity Oversight.

During the medium-term, Programme 2's response will be aligned to the following strategic interventions in the Tourism Sector Recovery Plan:

Strategic Intervention 1: Implement Norms and Standards for the safe operations in the sector across the value chain to enable safe travel and rebuild traveller confidence: Monitoring of the implementation of the Norms and Standards for safe operations in the sector will be undertaken.

Strategic Intervention 2: Stimulate domestic demand through targeted initiatives and campaigns: Measuring the impact of COVID-19 on the tourism sector will be undertaken, which, together with a number of research studies in this area, will contribute to the formation of appropriate initiatives and campaigns to stimulate domestic demand.

Quarterly and annual reports on the status of the tourism sector will be developed, which will assist with to provide a sense with regard to the effectiveness of the interventions.

Strategic Intervention 4: Support for the protection of core tourism infrastructure and assets: Monitoring of the implementation of the Tourism Relief Fund will be undertaken, which will assist in determining the effectiveness of this Fund as a relief measure.

Strategic Intervention 5: Execute a global marketing programme to reignite international demand: Quarterly and annual reports on the status of the tourism sector will be developed, which assist to provide a sense with regard to the effectiveness of the interventions.

Strategic Intervention 6: Tourism Regional Integration: This will be done, amongst others, through the contribution of the implementation of the Tourism Sector Plan for SADC.

Strategic Intervention 7: Review the tourism policy to deliver efficient, effective and purpose-led support for sector growth and development: The review of the overarching policy framework guiding tourism in the country (i.e., White Paper on the Development and Promotion of Tourism in South Africa, 1996) is important to ensure that recent developments are taken into consideration.

These objectives contribute directly to the Tourism Sector's response to the Economic Reconstruction and Recovery Plan (ERRP), and indirectly contribute to the ERRP.

5.8.1 Narrative: explanation of the resources allocation to achieve the outputs

Tourism Research, Policy and International Relations programme has a budget allocation of R1 382.2 million for 2021/22 of which R1 297 million is transferred to South African Tourism. This represents 93.8 per cent of the branch's budget allocation. The remaining allocation available for this Programme is R85.2 million of which R53.6 million is allocated to Compensation of Employees for the branch. The foreign transfer payments of the membership fee in respect of United Nation World Tourism Organisation (UNWTO) is vested in this branch.

Programme 3: Destination Development

Purpose: Facilitate and coordinate tourism destination development.

Sub-programmes and purpose:

- **Tourism Enhancement** increases the competitiveness of South Africa's tourism industry.
- **Destination Planning and Investment Coordination** ensures that tourism infrastructure supports the current and future growth of the sector.
- **Working for Tourism** facilitates the development of tourism infrastructure projects under the Expanded Public Works Programme through labour-intensive methods targeted at youth, women, unemployed and disabled people, and small, medium and micro enterprises.

5.11 Planned performance over the medium-term period

Programme 3 - Destination Development, responds to tourism demand (i.e. the needs of tourists) by ensuring that supply side measures are put in place for tourism places and physical spaces. This is achieved through the provision of coherent destination planning, investment promotion, tourism product and infrastructure enhancement and development, experience development and job creation.

During the medium-term, the Programme's response will align with the following areas in the Tourism Sector Recovery Plan:

Strategic Intervention 2: Stimulate domestic demand through targeted initiatives and campaigns

- The correct product-pricing mix are a key to addressing domestic demand. This would include the costs and availability of the transport enabler that allows tourists to get to and move within destinations. While South Africa has no shortage of tourism products, both public and private sector owners will have to consider how these products are packaged and priced for the domestic and regional consumer. The **pilot on the budget resort concept and brand** is an initiative to meet the anticipated changes in domestic and regional demand. The key risks related to this initiative pertain to the lack of stakeholder buy-in, resourcing and institutional arrangements. If these risks are addressed, they inevitably become key enablers for the budget resort concept and brand piloting process.
- Aligned with this initiative is the incorporation of prioritised initiatives from tourism masterplans into **DDM One Plans for various districts**.

Strategic Intervention 3: Launch an investment and resource mobilisation programme

- Resource and investment mobilisation efforts to support supply requirements of the COVID-19 era will continue. This support will be provided through **investment promotion efforts for both existing (Brownfield) and new (Greenfield) projects**. Project packaging is a key enabler for successful investment promotion efforts. The key risk at present is that there is high global demand for investors and this may hamper resource and investment mobilization efforts.

Strategic Intervention 4: Support for the protection of core tourism infrastructure and assets

- A critical part of the recovery effort is to ensure that, while travel volumes have almost ground to a halt, the supply side of the sector is protected and rejuvenated. **Tourism infrastructure development and maintenance works of products and attractions** will create job and SMME opportunities, in compliance with the PFMA. There is substantial scope for labour intensive work through construction work and maintenance contracts to promote SMME development, Broad-Based Black Economic Empowerment (B-BBEE), involvement of women and youth, and local employment coupled with appropriate enterprise development. The programme measures the quality of product offerings, to enhance the visitor experience that will be implemented in the medium-term in order to improve destination competitiveness.
- A key intervention to protect tourism supply is the implementation of a **Tourism Infrastructure Maintenance Programme of state-owned assets**. The planned initiative involves destination enhancement of South African tourism assets and infrastructure making South Africa a diverse and unique tourism destination. The focus is on **diversifying and enhancing tourism product offerings**, with specific reference to improving and upgrading experiences at key tourism sites such as at **World Heritage Sites, National Heritage Sites, National Parks, Botanical Gardens, Indi-Atlantic Route, Rural/Township precincts**.
- Another key intervention in this area of work is the investment in the **development of community owned tourism assets** to support inclusive economic growth, product diversification and geographic spread. The key risks for this infrastructure programme relates to third party reliance and operational models. However, effective stakeholder compacts, contract management and early operator involvement in mobilising operational expertise and funding are key enablers to mitigate these risks.

These objectives contribute directly to the Tourism Sector's response to the Economic Reconstruction and Recovery Plan (ERRP) in respect of the following areas: Growing the productive economy; Mass public employment interventions; Infrastructure investment; Green economy interventions; Gender equality and the inclusion of women and youth; and, support for tourism recovery and growth.

5.1.1 Narrative: explanation of the resources allocation to achieve the outputs

Destination Development has a budget allocation of R305.6 million for 2021/2022 of which R216.6 million is allocated to the Working for Tourism sub-programme. Working for Tourism represents 70.9 per cent of the budget of the total programme. Working for Tourism consists of the Expanded Public Work Programme and Expanded Public Work Incentive Programme. R55.9 million is allocated to Compensation of Employees for the branch.

Programme 4: Tourism Sector Support Services

Purpose: Enhance transformation, increase skill levels and support the development of the sector to ensure that South

Africa is a competitive tourism destination.

Sub-programmes and Purpose:

- **Tourism Human Resource Development** facilitates the efficient management and implementation of human resource development initiatives for the tourism sector.
- **Enterprise Development and Transformation** facilitates inclusive participation and sustainability in the tourism sector.
- **Tourism Visitor Services** ensures the integrity of information and facilitates accurate tourism information.
- **Tourism Incentive Programme** manages the establishment of capital and non-capital tourism incentives to promote and encourage the development and growth of the tourism sector.

Implementation Plan developed and approved. 	Educators Development Programme implemented and progress report developed.	Educators Development Programme implemented and progress report developed.	Educators Development Programme implemented in all nine provinces and annual report developed.	

5.15 Explanation of planned performance over the medium-term period

The Tourism Sector Support Services ensures that the tourism sector is transformed, and supported through the Skills Development and Enterprise Development Programmes. The outputs and outcomes identified will not only assist in empowering retrenched women, youth and people with disabilities to enjoy and participate in the tourism space, but will ensure that interventions are set and implemented for tourism across the value chain to enable safe tourism operation and rebuild consumer confidence.

Enterprise Development and Transformation

Transformation is one of the key pillars of the NDP, and the main driver for inclusive economic growth and job creation. Following the amendment of the Generic Codes for B-BBEE by the DTIC, the Tourism Transformation Council of South Africa developed the new transformation Code for the tourism sector in consultation with tourism stakeholders to de-racialise and advance economic transformation in the sector. The performance is to deliver needs-based enterprise development support programmes that will strengthen the sustainability of rural based tourism enterprises, including community owned tourism establishments. The outputs and outcomes identified will seek to increase the participation of women and youth in tourism. Responsible tourism is key in ensuring the sustainable usage of tourism resources in order to ensure that future generations also benefit from these resources. Through the implementation of Responsible Tourism, South Africa is responding to the risks of unsustainable tourism, by adopting a co-ordinated approach to Responsible Tourism. The Department will review its Tourism Environmental Implementation Plan developed in 2017 and will finalise the Climate Change Adaptation Report to ensure sustainability of the identified tourism sites in the nine provinces to be competitive, thus contributing to tourism growth.

The Domestic Tourism Growth Strategy aims to increase domestic tourism expenditure (revenue); domestic tourism value; enhancing measures and efforts aimed at addressing seasonality and equality geographical spread; and enhancing the level of culture of travel and tourism among South Africans.

Visitor Support Services

Visitor services are key to domestic and international travel as they seek to ensure information integrity and facilitates accurate information for planning travel to the country. They may take the form of the provision of tourism information (including all travel information channels, through digital, brochures, Visitor Information Centres). When travellers visit a country, it is important for them to be assured of safety when travelling through a destination to experience a variety of a country's attractions. The outputs and outcomes identified will not only promote visible safety monitoring but will ensure that the norms and standards set to promote safe tourism operations are well promoted and monitored at different attractions across the country.

The well-being of tourist guides also contributes to the experience of our visitors and tourists. The Tourism Act, No. 3 of 2014 regulates the tourist guiding sector including the behaviour and conduct of tourist guides through the code of conduct. Programmes related to training and capacity building of this important sector will be undertaken in line with the global marketing strategy of the country to ensure that tourist guiding provide excellent and memorable experience to back up the sector as it continues to recover from the COVID-19 pandemic.

Tourism Sector Human Resource Development

Great advances have been made in the introduction of tourism and hospitality to the formerly disadvantaged schools that are mostly found in rural areas and townships. Tourism is a new learning area; it was also one of those subjects that were construed as a new strategy to advance job opportunities in South Africa. Teaching of tourism in South Africa takes place in public and private high schools and universities especially since 1996. It is envisioned that our programmes would benefit mostly learners from the previously disadvantaged communities, including a focus on the development of women to participate meaningfully as executives in the tourism workplace or as business owners.

5.1.1 Narrative: explanation of the resources allocation to achieve the outputs

Great advances have been made in the introduction of tourism and hospitality to the formerly disadvantaged schools that are mostly found in rural areas and townships. Tourism is a new learning area; it was also one of those subjects that were construed as a new strategy to advance job opportunities in South Africa. It was also assumed and thought that tourism will benefit mostly learners from the previously disadvantaged communities. Teaching of tourism in South Africa takes place in public and private highly schools and universities especially since 1996. The capacity to deal with tourism challenges is still a problem at the provisioning.

6. UPDATED KEY RISKS

Table 9: Updated Key Risks

Outcome	Key Risk	Risk Mitigation
Increase the tourism sector's contribution to inclusive economic growth.	Inability to meet the Tourism B-BBEE Sector Code targets to facilitate radical economic transformation within tourism sector.	<ul style="list-style-type: none"> Support the Tourism Transformation Charter Council of South Africa to be independent from the Department of Tourism to enable improved monitoring of transformation. Establish mechanism for monitoring and reporting of sector transformation targets.
	Inability to create an enabling legislative and regulatory environment for tourism development and growth.	Policy review on tourism promotion and development.
	Norms and standards for safe operations in tourism sector not implemented.	Encourage the sector to implement norms and standards for safe tourism operations.
	Poor brand reputation, and potential visitors' perceptions about safety of destination South Africa.	<ul style="list-style-type: none"> Develop policy directives to SA Tourism regarding strengthening of the destination brand. Collaborate with Police Services to improve safety for tourists. Develop and drive campaigns, messaging to promote domestic tourism locally and internationally.
	Decline in supply side products and services following the COVID-19 pandemic.	Participation in the development and implementation of the Tourism Recovery Plan.
	Negative effect of public health emergencies due to global outbreaks.	<ul style="list-style-type: none"> Strengthen performance of domestic market. Collaborate with health authorities to ensure appropriate messaging about South Africa is communicated. Engage Host Employers to health programmes to be implemented to foster customer confidence.
	Negative impacts of climate change (including natural disasters).	<ul style="list-style-type: none"> Create awareness about vulnerability of Destination South Africa and necessary mitigations. Drive responsible tourism for the sustainability of South Africa's unique attractions.
	Negative impacts on the implementation of signed bilateral agreements due to global health outbreaks of pandemics such Covid-19.	Cooperate with counterparts to find solutions to deal with such conditions whilst contributing to the promotion and development of the tourism sector.
	Negative impact of COVID-19 to employment creation.	Targeted approach to employment creation for the retrenched.
	Poor implementation of signed bilateral agreements due to health outbreaks and political instability.	Identify projects, options and available platforms to ensure that the implementation on signed MoU/Agreements is possible.
Capacity of SA Tourism to fulfil their mandate.	Strengthen oversight on SA Tourism.	

Outcome	Key Risk	Risk Mitigation
Achieve good corporate and cooperative governance.	Inadequate capacity for management of infrastructure and training projects.	Ensure the transfer of knowledge and skills by the DBSA in the management of infrastructure projects
	Inadequate contract management by project managers.	<ul style="list-style-type: none"> · Awareness on conclusion of quality contracts, vetting processes, Guarantees and Warranties. · Strengthen contract enforcement capacity. · Engage Service Providers to manage the completion of current contracts operating during COVID-19. · Strengthen project management, monitoring and reporting capacity of project managers. · Develop and implement systems for assessing project viability. · Develop and implement system for monitoring progress of projects.
	Inadequate impact evaluation of COVID-19 on the tourism sector.	Build networks with tourism associations to cover all enterprises in the sector.
	Inadequate understanding of the supply side of tourism.	Enforce the regulations by calling for information from tourism businesses, products and services to understand the entire supply side of tourism.
	Monopoly and collusive practices by suppliers.	<ul style="list-style-type: none"> · Monitor supplier pattern. · Encourage supplier rotation. · Supplier development initiatives.
	Corruption	Strengthen internal controls and apply consequence management.

7. PUBLIC ENTITY

Table 10: Public Entity

Name of Public Entity	Mandate	Outcomes	Current Annual Budget (R'000)
South African Tourism (SA Tourism)	<p>Chapter 3 of the Tourism Act, 2014 stipulates the following as the functions of the SA Tourism Board:</p> <ul style="list-style-type: none"> · Market South Africa as a domestic and international tourist destination · Market SA Tourism products and facilities internationally and domestically · Develop and implement a marketing strategy for tourism that promotes the objectives of the Act and the NTSS · Advise the Minister on any other matter relating to tourism marketing · With the approval of the Minister, establish a National Conventions Bureau to market South Africa as a business tourism destination by: <ul style="list-style-type: none"> o Coordinating bidding for international conventions; o Liaising with other organs of state and suitable bodies to promote South Africa as a destination for business events; and o Reporting to the Minister on the work performance of the National Conventions Bureau. <p>Additionally, the Minister assigned, in terms of section 44 of the Tourism Act, 2014, the implementation and management of the National Grading System for Tourism to the Board.</p>	<ul style="list-style-type: none"> · Increase the tourism sector's contribution to inclusive economic growth. · Achieve good corporate and cooperative governance. 	<ul style="list-style-type: none"> · 2021/22 R 1 297 038 · 2022/23 R 1 329 206 · 2023/24 R 1 344 672

Table 11: Infrastructure Projects

No.	Project name	Programme	Project description	Outputs	Project start date	Project completion date	Total estimated cost	Current year expenditure
1	Thirty Community-based Tourism Projects implemented in various parts of the country.	Destination Enhancement and Working for Tourism	Support the Implementation of Thirty Community-based Tourism Projects	Implementation of Thirty Community-Based Tourism Projects supported and monitored.	November 2020	30 October 2022	R 573 460 000	R 65 132 000 (Note: As these are multi-year projects, both the funding and implementation will be managed over multiple financial years).

9. PUBLIC PRIVATE PARTNERSHIP

None

**PART D:
TECHNICAL INDICATOR DESCRIPTION
(TID)**

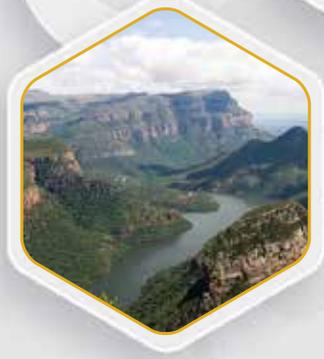

Table 13: Corporate Management

Indicator title	Output Indicator 1: Audit outcome on financial statements and performance information.
Definition	Maintenance of clean administration characterised by compliance with laws and regulations, no findings on pre-determined objectives, and no findings on financial management. The Auditor-General performs audit procedures that concludes on reliability and usefulness of financial and non-financial performance information.
Source of data	Auditor-General's Report
Method of calculation/ assessment	Audit procedures by the Auditor-General South Africa (AGSA)
Means of verification	Final Audit Report and the Final Management Report issued by the AGSA
Assumptions	Effective audit procedures by AGSA on conducting audit
Disaggregation of beneficiaries (where applicable)	Not Applicable
Spatial transformation (where applicable)	Not Applicable
Calculation type	Non-cumulative
Reporting cycle	Annual with a four-month lag
Desired performance	Unqualified audit as a result of clean administration
Indicator responsibility	DDG: Corporate Management and Chief Financial Officer

Indicator title	Output Indicator 2: Vacancy rate.
Definition	Measures percentage of vacant posts as a proportion of funded posts.
Source of data	Persal System
Method of calculation / assessment	Percentage of vacant posts as a proportion of funded posts (Number of funded vacant posts / total funded establishment = vacancy rate)
Means of verification	Vacancy rate report from PERSAL system
Assumptions	Reliability and availability of PERSAL reports
Disaggregation of beneficiaries (where applicable)	Not Applicable
Spatial transformation (where applicable)	Not Applicable
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Desired performance	Performance lower than target is acceptable, i.e. vacancy rate lower than 10%
Indicator responsibility	Director: Human Resources Administration and Employee Relations

Indicator title	Output Indicator 3: Percentage compliance with equity targets in terms of departmental Employment Equity Plan.
Definition	Measures: <ul style="list-style-type: none"> · Percentage women representation in the Senior Management Service; · Percentage representation of people with disabilities as a proportion of the filled posts; · Percentage representation of black people as a proportion of filled posts.
Source of data	Persal System
Method of calculation/ assessment	Proportional representation of prioritised categories against filled posts, or against filled SMS posts for women representation
Means of verification	EE Report with evidence
Assumptions	Reliability and availability of PERSAL reports
Disaggregation of beneficiaries (where applicable)	Not Applicable
Spatial transformation (where applicable)	Not Applicable
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Desired performance	Performance higher than target is acceptable
Indicator responsibility	Director: Human Resources Administration and Employee Relations

Indicator title	Output Indicator 4: Percentage implementation of Workplace Skills Plan (WSP) with defined targeted training interventions.
Definition	Measures level of progress with implementation of the WSP, i.e. a guiding document that outlines the training and development interventions on which the department is planning to focus for a particular financial year.
Source of data	Progress report form HRD Unit
Method of calculation / assessment	Number of interventions implemented against the total planned for the year
Means of verification	Annual Training Report with evidence
Assumptions	Reliability of reports from the unit
Disaggregation of beneficiaries (where applicable)	<ul style="list-style-type: none"> · Target for women: 50% · Target for youth: 5% of the establishment (internship programme)
Spatial transformation (where applicable)	Not Applicable
Calculation type	Cumulative
Reporting cycle	Quarterly and Annual
Desired performance	Performance higher than target is acceptable
Indicator responsibility	Director: Human Resource Utilisation and Employee Health and Wellness

Indicator title	Output Indicator 5: Percentage implementation of the Annual Internal Audit Plan.
Definition	<ul style="list-style-type: none"> · Conduct internal audit activities in the field of governance and compliance audit, financial and forensic audit, audit of performance information and performance audit, information technology audit. · Develop a risk-based internal audit plan, which includes the priority areas identified for audit.
Source of data	Internal Audit Plan, Risk Register, AGSA Reports, Previous Internal Audit Reports and Management Requests.
Method of calculation/ assessment	Number of issued reports as per the approved internal audit plan.
Means of verification	<ul style="list-style-type: none"> · Finalised internal audit reports issued to the Accounting Officer. · Progress Report against the internal audit plan presented to Audit Committee quarterly meetings.
Assumptions	Factors that are accepted as true and certain to happen without proof.
Disaggregation of beneficiaries (where applicable)	Not Applicable
Spatial transformation (where applicable)	Not Applicable
Calculation type	Cumulative (Year-End)
Reporting cycle	Quarterly
Desired performance	Improved risk management, control and governance processes
Indicator responsibility	Director: Internal Audit

Indicator title	Output Indicator 6: Departmental Communication Strategy and Awareness Campaign Plan implemented.
Definition	Measures the number of Implementations Plans and Awareness Campaigns implemented as per the Annual Communication Strategy.
Source of data	Communications Unit
Method of calculation / assessment	Simple count: number of plans implemented against strategy and Annual Campaigns Plans.
Means of verification	Reports from the unit with evidence
Assumptions	Reliability of reports from the unit
Disaggregation of beneficiaries (where applicable)	<ul style="list-style-type: none"> · Youth, Women, People with Disabilities · Community members · General public · Project Beneficiaries · Media and Journalists
Spatial transformation (where applicable)	Spatial distribution can be provided for specific projects
Calculation type	Cumulative
Reporting cycle	Quarterly and Annually
Desired performance	Performance higher than target is acceptable
Indicator responsibility	Chief Director: Communications

Indicator title	Output Indicator 7: Percentage procurement of goods and services from B-BBEE compliant businesses and SMMEs.
Definition	Measures percentage expenditure from B-BBEE-compliant businesses and SMMEs.
Source of data	LOGIS and BAS system and Central Supplier Database (CSD).
Method of calculation/ assessment	Expenditure on procurement from B-BBEE compliant businesses and SMMEs as a proportion of total departmental expenditure.
Means of verification	Reports from OCFO with evidence.
Assumptions	Procurement from government institutions to be excluded.
Disaggregation of beneficiaries (where applicable)	Disaggregated information for women, SMMEs, PWDs.
Spatial transformation (where applicable)	Not Applicable
Calculation type	Cumulative
Reporting cycle	Quarterly
Desired performance	Performance higher than target is acceptable
Indicator responsibility	Chief Financial Officer

Indicator title	Output Indicator 8: Number of initiatives implemented to support tourism sector recovery.
Definition	Measures the number of initiatives implemented to support the tourism sector recovery through targeted procurement of commercial venues for departmental conferences and meetings.
Source of data	LOGIS and BAS system and Central Supplier Database (CSD).
Method of calculation / assessment	Expenditure on procurement from B-BBEE compliant businesses and SMMEs as a proportion of total departmental expenditure.
Means of verification	Reports from OCFO with evidence.
Assumptions	Procurement from government institutions to be excluded
Disaggregation of beneficiaries (where applicable)	Disaggregated information for women, SMMEs, PWDs.
Spatial transformation (where applicable)	Not Applicable
Calculation type	Cumulative
Reporting cycle	Quarterly
Desired performance	Performance higher than target is acceptable
Indicator responsibility	Chief Financial Officer

Indicator title	Output Indicator 9: Percentage of invoices paid within prescribed timeframes.
Definition	Measures percentage of invoices paid within 30 days to suppliers of goods and services.
Source of data	BAS.
Method of calculation/ assessment	Invoices: Number of days taken to process payment for valid invoices received. Mandatory Payment: payments made to relevant bodies in line with prescripts.
Means of verification	Reports from OCFO with evidence.
Assumptions	Reliability of reports from the unit.
Disaggregation of beneficiaries (where applicable)	Not Applicable
Spatial transformation (where applicable)	Not Applicable
Calculation type	Cumulative
Reporting cycle	Quarterly
Desired performance	Performance higher than target is acceptable
Indicator responsibility	Chief Financial Officer

Indicator title	Output Indicator 10: Number of initiatives implemented to promote reasonable access
Definition	Measures the number of initiatives implemented to promote reasonable access.
Source of data	Organisational Development and Service Delivery Improvement Directorate.
Method of calculation / assessment	Simple count: Number of projects implemented against planned projects.
Means of verification	Reports from OD&SDI with evidence.
Assumptions	Reliability of reports from the unit.
Disaggregation of beneficiaries (where applicable)	Data on number of people with disability who are beneficiaries of the initiatives.
Spatial transformation (where applicable)	Not Applicable
Calculation type	Cumulative
Reporting cycle	Quarterly and Annually
Desired performance	Performance higher than target is acceptable
Indicator responsibility	Director: Organisational Development and Service Delivery Improvement

Indicator title	Output Indicator 11: Number of initiatives implemented to promote gender equity.
Definition	Measures the number of initiatives implemented to promote gender equity.
Source of data	Organisational Development and Service Delivery Improvement Directorate.
Method of calculation/ assessment	Simple count: Number of projects implemented against planned projects.
Means of verification	Reports from ODSDI with evidence.
Assumptions	Reliability of reports from the unit.
Disaggregation of beneficiaries (where applicable)	Disaggregated data on gender.
Spatial transformation (where applicable)	Not Applicable
Calculation type	Cumulative
Reporting cycle	Quarterly and Annually
Desired performance	Performance higher than target is acceptable
Indicator responsibility	Director: Organisational Development and Service Delivery Improvement

Indicator title	Output Indicator 12: Number of initiatives implemented to promote integrity and ethical conduct.
Definition	Measures the initiatives implemented to promote integrity and ethical conduct.
Source of data	Risk & Integrity Management Unit.
Method of calculation / assessment	Simple count: Number of projects implemented against planned initiatives
Means of verification	Reports from Risk and Integrity Management Unit
Assumptions	Reliability of reports from the unit.
Disaggregation of beneficiaries (where applicable)	Not Applicable
Spatial transformation (where applicable)	Not Applicable
Calculation type	Cumulative (Year-End)
Reporting cycle	Quarterly and Annually
Desired performance	Performance higher than target is acceptable
Indicator responsibility	Director: Risk and Integrity Management

Table 14: Tourism Research, Policy and International Relations

Indicator title	Output Indicator 1: Number of monitoring and evaluation reports produced.
Definition	Measures the number of monitoring and evaluation reports produced to inform planning and decision-making.
Source of data	Online primary data will be collected on projects and programmes, WTTC, UNWTO, StatsSA, SA Tourism and Department of Tourism Reports as well as Reports from NTSS Work Streams.
Method of calculation/ assessment	<ul style="list-style-type: none"> · Simple count. · Quantitative and qualitative.
Means of verification	Reports from the unit.
Assumptions	Reliability of reports from the sources of data.
Disaggregation of beneficiaries (where applicable)	<ul style="list-style-type: none"> · Women · Youth · People with disability · Other groups
Spatial transformation (where applicable)	<ul style="list-style-type: none"> · Disaggregation by province. · Impact evaluation by province-where relevant.
Calculation type	Cumulative and non-cumulative
Reporting cycle	Quarterly and annually
Desired performance	<p>Performance higher than target is desirable</p> <p>Dissemination of tourist information through modern platforms</p>
Indicator responsibility	<ul style="list-style-type: none"> · Directors from Chief Directorate Research and Knowledge Management · Chief Director: Policy Planning and Strategy

Indicator title	Output Indicator 2: Number of initiatives implemented to create an enabling policy and regulatory environment for tourism growth and development.
Definition	Measures the number of initiatives implemented to create an enabling policy and regulatory environment for tourism growth.
Source of data	Consultations with organised and individual tourism stakeholders; reports from international tourism organisations; reports from relevant research institutions; recently approved documents and reports by the department and relevant reports from other government departments.
Method of calculation / assessment	Qualitative approach - progress reports.
Means of verification	Reports from the unit with evidence.
Assumptions	Reliability of reports from the unit and cooperation from relevant stakeholders.
Disaggregation of beneficiaries (where applicable)	Not Applicable
Spatial transformation (where applicable)	Not Applicable
Calculation type	Cumulative
Reporting cycle	Quarterly
Desired performance	Creation of an enabling environment for the tourism sector to thrive
Indicator responsibility	<p>Chief Director: Policy, Planning and Strategy;</p> <p>Director: Knowledge Management</p>

Indicator title	Output Indicator 3: Number of SA Tourism oversight reports developed.
Definition	Measures the number of initiatives implemented to promote innovation in the South African Tourism Sector.
Source of data	Reports from relevant Units.
Method of calculation/ assessment	Simple count - number of initiatives conducted against planned initiatives.
Means of verification	Reports from the units with evidence.
Assumptions	Reliability of reports from the relevant units.
Disaggregation of beneficiaries (where applicable)	Not Applicable
Spatial transformation (where applicable)	Not Applicable
Calculation type	Cumulative
Reporting cycle	Quarterly and annually
Desired performance	Performance higher than target is desirable
Indicator responsibility	Director: Knowledge Management

Indicator title	Output Indicator 4: Number of Information and Knowledge Systems developed and implemented.
Definition	Measures the number of systems developed for tourism.
Source of data	Knowledge Management Unit.
Method of calculation / assessment	Simple count – number of systems developed against planned.
Means of verification	Reports from the unit with evidence.
Assumptions	Reliability of reports from the unit.
Disaggregation of beneficiaries (where applicable)	Not Applicable
Spatial transformation (where applicable)	Not Applicable
Calculation type	Cumulative
Reporting cycle	Annually
Desired performance	Performance higher than target is desirable
Indicator responsibility	Director: Knowledge Management

Indicator title	Output Indicator 5: Number of fora prioritised to advance South Africa's tourism interests at regional, continental and global level through multilateral other groupings
Definition	Measures the number of fora prioritised to advance South Africa's tourism interests at regional, continental and global level through multilateral other groupings
Source of data	Reports from the International Relations Unit.
Method of calculation/ assessment	Simple count - number of initiatives produced against planned initiatives.
Means of verification	Reports from the unit with evidence.
Assumptions	Reliability of reports from the unit.
Disaggregation of beneficiaries (where applicable)	Not Applicable
Spatial transformation (where applicable)	Not Applicable
Calculation type	Cumulative
Reporting cycle	Quarterly and annually
Desired performance	Performance higher than target is desirable
Indicator responsibility	Chief Director: International Relations and Cooperation

Indicator title	Output Indicator 6: Number of outreach programmes to the diplomatic community implemented
Definition	Measures the number of outreach programmes to the diplomatic community implemented
Source of data	Reports from the International Relations Unit.
Method of calculation / assessment	Simple count
Means of verification	Reports from the unit with evidence.
Assumptions	Reliability of reports from the unit.
Disaggregation of beneficiaries (where applicable)	Not Applicable
Spatial transformation (where applicable)	Not Applicable
Calculation type	Non-cumulative
Reporting cycle	Quarterly and annually
Desired performance	Robust deliberations on the status of tourism in Africa, with specific reference to challenges and possible solutions to be adopted. These will be captured in a report, which will be shared with participants
Indicator responsibility	Chief Director: Africa and Middle East

Table 15: Destination Development

Indicator title	Output Indicator 1: Number of destination planning and investment coordination initiatives undertaken.
Definition	Measures number of destination planning and investment coordination initiatives that will be implemented in the medium term in order to support destination enhancement.
Source of data	Reports from the Unit.
Method of calculation/ assessment	Simple count – number of initiatives implemented against planned initiatives.
Means of verification	Reports from the unit with evidence.
Assumptions	Reliability of reports from the unit.
Disaggregation of beneficiaries (where applicable)	Not Applicable
Spatial transformation (where applicable)	Spatial information on distribution of initiatives must be reported
Calculation type	Cumulative
Reporting cycle	Quarterly and annually
Desired performance	Performance higher than target is acceptable
Indicator responsibility	Chief Director: Destination Planning and Investment Coordination

Indicator title	Output Indicator 2: Number of destination enhancement initiatives supported.
Definition	Measures number of destination enhancement initiatives that will be implemented in the medium term in order to improve destination competitiveness.
Source of data	Reports from the Unit and Draft Tourism Recovery Plan.
Method of calculation / assessment	Simple count – number of initiatives implemented against planned initiatives.
Means of verification	Reports from the unit with supporting evidence.
Assumptions	Reliability of reports with supporting evidence from the unit.
Disaggregation of beneficiaries (where applicable)	Not Applicable
Spatial transformation (where applicable)	Spatial information on distribution of initiatives must be reported
Calculation type	Cumulative
Reporting cycle	Quarterly and annually
Desired performance	Performance higher than target is acceptable
Indicator responsibility	Chief Director: Tourism Enhancement

Indicator Title	Output Indicator3: Number of work opportunities created through Working for Tourism projects.
Definition	<p>Measures the number of jobs created through the Department's Working for Tourism Programme, through the use of labour-intensive methods targeting the unemployed, youth, women, people with disabilities and SMMEs.</p> <p>A work opportunity is an aid work created for an individual on an EPWP project for any period. The same person can be employed on different projects and each period of employment will be counted as a work opportunity.</p>
Source of data	Reports from the Unit
Method of calculation / assessment	The calculation of work opportunities and FTEs is in accordance with a formula supplied by the Department of Public Works.
Means of verification	Reports from the unit with evidence
Assumptions	Reliability of reports from the unit
Disaggregation of beneficiaries (where applicable)	Provide disaggregated data for youth, gender and PWDs
Spatial transformation (where applicable)	Provide data on spatial distribution of beneficiaries
Calculation Type	Non-cumulative
Reporting cycle	Quarterly
Desired performance	Performance higher than target is acceptable
Indicator responsibility	Chief Director: Working for Tourism

Table 16: Tourism Sector Support Services

Indicator title	Output Indicator 1: Number of incentive programmes implemented.
Definition	Measures the number of transactions supported under the Tourism Equity Fund (TEF) implemented through the Small Enterprise Finance Agency (SEFA) to stimulate inclusive tourism development and sector transformation through funding support for large scale capital investment in the tourism sector by black tourism industrialists.
Source of data	Reports received from SEFA as the implementation partner on the TEF.
Method of calculation/ assessment	Simple count
Means of verification	Reports from the unit
Assumptions	<ul style="list-style-type: none"> · Sufficient applications and uptake of programmes. · Efficient administrative processes of implementation partner.
Disaggregation of beneficiaries (where applicable)	Yes, in terms of gender, ownership and transformation status.
Spatial transformation (where applicable)	Yes, in terms of geographic spread of beneficiaries
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Desired performance	Performance higher than target is acceptable
Indicator responsibility	Chief Director: Tourism Incentive Programme

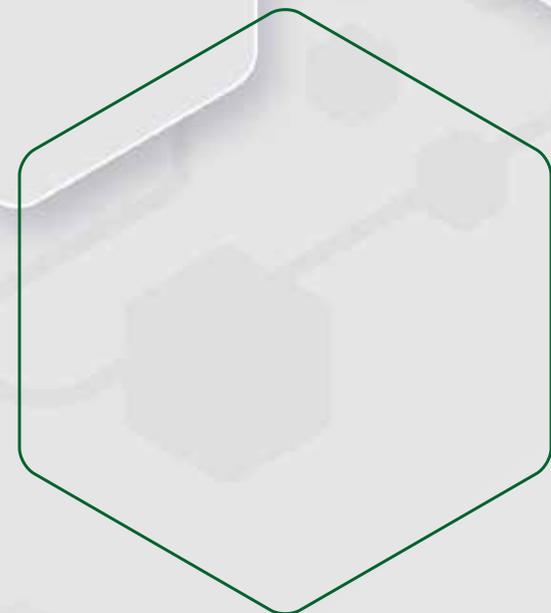

Indicator title	Output Indicator 2: Number of programmes implemented to stimulate domestic tourism
Definition	Measures the number of initiatives implemented to stimulate domestic tourism.
Source of data	Domestic Tourism Facilitation
Method of calculation / assessment	4 initiatives planned, 1 completed, 3 to be completed in Q4.
Means of verification	Reports with evidence.
Assumptions	Reliability of reports from the unit.
Disaggregation of beneficiaries (where applicable)	Not Applicable
Spatial transformation (where applicable)	Gauteng, North West, Western Cape and KwaZulu-Natal
Calculation type	Non-cumulative
Reporting cycle	Quarterly and annually
Desired performance	Performance higher than target is acceptable
Indicator responsibility	Chief Director: Enterprise Development and Transformation

Indicator title	Output Indicator 3: Number of programmes implemented to increase participation of the SMMEs in the tourism sector for inclusive economic growth.
Definition	Assesses non-financial support provided to SMMEs (Six incubators and business support programmes and youth in the food services business) for enterprise development and growth.
Source of data	Enterprise Development and Transformation Chief Director: Enterprise Development.
Method of calculation/ assessment	4 operational and 2 close to inception pending finalisation of project management.
Means of verification	Reports from the unit with evidence.
Assumptions	Reliability of reports from the unit
Disaggregation of beneficiaries (where applicable)	Planned targets and budgets for the 2021/22 and 2022/23. of the Incubation projects are 60% women, 25% youth and 5% people living with disabilities
Spatial transformation (where applicable)	<ul style="list-style-type: none"> Phalaborwa in Limpopo Province, Manyeleti in Mpumalanga and Mier in Northern Cape Provinces. The Food services youth initiative, tour operators and the tourism technology innovation incubation programmes will be countrywide. Recruitment being finalised and data on spatial representation to be provided later.
Calculation type	Non-cumulative
Reporting cycle	Quarterly and annually
Desired performance	Performance higher than target is acceptable
Indicator responsibility	Chief Director: Enterprise Development and Transformation

Indicator title	Output Indicator 4: Number of initiatives implemented to increase participation of women in the tourism sector.
Definition	Measures the initiatives implemented to increase women participation in the tourism sector.
Source of data	2 initiatives planned: 1 underway: UNWTO Pilot Programme Completed; and 1 Business Development Programme for 225 women: 25 women-owned SMMEs per Province (9 Provinces)
Method of calculation / assessment	Simple count – number of initiatives implemented against planned initiatives.
Means of verification	Reports from the unit with evidence
Assumptions	Reliability of reports from the unit
Disaggregation of beneficiaries (where applicable)	225 women: 25 per province
Spatial transformation (where applicable)	Provide reports on spatial distribution of beneficiaries. The UNWTO: Limpopo Province: Mopani and Vhembe District Business Support Development Programme: 25 women-owned SMMEs in each of the nine (9) provinces: 225 women beneficiaries.
Calculation type	Non-cumulative
Reporting cycle	Quarterly and annually
Desired performance	Performance higher than target is acceptable
Indicator responsibility	Chief Director: Enterprise Development and Transformation

Indicator title	Output Indicator 5: Number of initiatives for Improving Visitor Services implemented.
Definition	Measures the number of programmes implemented in order to enhance visitor service and experience.
Source of data	Chief Director: Tourism Visitor Services.
Method of calculation/ assessment	Simple count – number of programmes implemented against planned programmes.
Means of verification	Reports from the Tourism Visitor Services Unit with evidence.
Assumptions	Reliability of reports from the unit.
Disaggregation of beneficiaries (where applicable)	Not Applicable
Spatial transformation (where applicable)	Provide reports on spatial distribution of beneficiaries
Calculation type	Cumulative
Reporting cycle	Quarterly and annually
Desired performance	Performance higher than planned is desirable
Indicator responsibility	Chief Director: Tourism Visitor Services

Indicator title	Output Indicator 6: Number of capacity-building programmes implemented.
Definition	Measures the number of capacity-building programmes implemented in order to develop and strengthen the skills of youth within the tourism industry.
Source of data	Chief Director: Tourism Sector Human Resource Development.
Method of calculation / assessment	Simple count – number of programmes implemented against planned programmes.
Means of verification	Reports from the CD TSHRD Unit with evidence
Assumptions	Reliability of reports from the unit
Disaggregation of beneficiaries (where applicable)	Provide disaggregated data for youth, gender and PWDs
Spatial transformation (where applicable)	<ul style="list-style-type: none"> · Provide reports on spatial distribution of beneficiaries and programmes · Include townships, small towns and villages where applicable
Calculation type	Cumulative
Reporting cycle	Quarterly and annually
Desired performance	Performance higher than planned is desirable
Indicator responsibility	Chief Director: Tourism Sector Human Resource Development
