WOMEN IN TOURISM PROVINCIAL CHAPTERS

1. BACKGROUND

In 2010, the United Nation World Tourism Organisation (UNWTO) released the Global Report on Women in Tourism, highlighting the value of the sector as an engine for economic development through foreign exchange earnings, and the creation of direct and indirect employment.

The report further elucidates that this value, however, does not translate into an equitable distribution of economic impacts between men and women in the sector, especially in the developing economies.

The report also specified that tourism growth present challenges and opportunities for gender equality and women's empowerment. Concerning opportunities, Tourism presents a number of income generating activities for women and the jobs are flexible and are able to be carried out at different locations, home, community, and the workplace. However, women are faced with challenges of concentration in the low status, low paid, and precarious jobs in the sector.

The Women in Tourism (WiT) Programme commenced in 2013 as a platform to drive initiatives that support the development and empowerment of women in the tourism sector. This platform recognised the challenges faced by women entrepreneurs who are often found at the bottom end of the tourism economic value chain and identify interventions that will assist in realising the WiT agenda. Its focus areas included training on personal development, supporting women to develop a competitive advantage in their businesses and the provision of capacity building initiatives.

The pillars of the NTSS have guided the institutional arrangements for the WiT. The 5 pillars are namely - Effective Marketing, Broad Based Benefits, Destination Management, Visitor Experience and Facilitating Ease of Access.
